SUMMARY

3rd-year Information Technology student at Zagazig University with strong hands-on experience in backend development using Node.js, TypeScript, Express.js, and MongoDB. Completed intensive training programs including NTI MEAN Stack (210 hours) and Manara learning paths in Modern JavaScript and Backend Node.js. Built and deployed multiple production-grade REST API projects with a focus on clean architecture, scalability, and performance optimization. Passionate about backend engineering and security, continuously building secure, efficient, and production-ready server-side applications.

PROJECTS

Event Booking & Queue Management System https://github.com/Joo-Shohber/Booking-System.git

Node.js · TypeScript · Express.js · MongoDB · Redis · BullMQ · Socket.io · JWT · Cloudinary

- Built a production-ready REST API for event booking with real-time queue management and WebSocket notifications.
- Implemented atomic slot booking using Redis Lua scripts to prevent race conditions under concurrent load.
- Designed a FIFO waitlist with auto-promotion via BullMQ workers and delayed job expiration.
- Integrated Google OAuth, email OTP verification, JWT refresh token rotation with reuse detection, and Cloudinary image uploads.

FreelanceHub Platform API https://github.com/Joo-Shohber/FreelanceHub

Node.js · Express.js · MongoDB · JWT · RBAC

- Built a freelancing marketplace backend connecting clients and freelancers.
- Implemented project posting, a full bidding system, and role-based access control separating client and freelancer flows.

Restaurant Management API https://github.com/Joo-Shohber/Restaurant

Node.js · Express.js · MongoDB · Mongoose

- Developed backend to manage menu items, orders, and customer data with admin endpoints.
- Applied MVC architecture and modular routing for a clean, maintainable codebase.

Blog Application API https://github.com/Joo-Shohber/Blog-App

Node.js · Express.js · MongoDB · JWT

- Built a full RESTful API for a blogging platform with user authentication and role-based authorization.
- Implemented JWT auth, post CRUD, comments system, and user profile management.

TECHNICAL SKILLS

Backend	Node.js, TypeScript, Express.js, REST API Design (CRUD, Pagination, Filtering, Versioning), MVC Architecture
Auth	JWT, Google OAuth2, bcrypt, Access & Refresh Token Rotation, Role-Based Authorization, OTP Verification
Security	CORS, Helmet, Rate Limiting (Sliding Window via Lua), XSS & CSRF Protection, Idempotency Keys
Real-time	Socket.io, Redis Pub/Sub Adapter, WebSocket notifications

Queue / Jobs	BullMQ, Redis, Atomic Lua Scripts, Distributed Locking, Job Scheduling
Validation	Zod, Request Sanitization
Performance	Redis Caching, Response Compression, Graceful Shutdown, Health Checks
File & Email	Multer, Cloudinary, Nodemailer (OTP, Password Reset)
Logging	Pino, Morgan, Winston
Database	MongoDB, Mongoose (Transactions, TTL Indexes, Virtual Fields)
Frontend	HTML5, CSS3, JavaScript ES6+, TypeScript, Bootstrap, Flexbox, Grid
Tools	Git, GitHub, Postman, npm, VS Code
Languages	Arabic (Native), English (Intermediate — Technical)

EDUCATION

Bachelor of Science in Information Technology | Expected 2027

Faculty of Computers and Information — Zagazig University

TRAINING & CERTIFICATIONS

MEAN Stack Development — Full Stack Training (210 Hours)

National Telecommunication Institute (NTI) — Zagazig, Egypt

- Studied MongoDB, Express.js, Angular, and Node.js with a backend-focused approach.

Modern JavaScript & Backend Node.js — Manara (40 Hours)

- Covered JavaScript ES6+, REST APIs, server-side logic, and database integration.
